

INTRODUCTION TO ENVIRONMENTAL AWARENESS

highfield
online training

Our introduction to environmental awareness e-learning course is designed to help learners understand what the environment is and why it is important to protect it. Learners will learn about different types of pollution, how it happens and why it is important to prevent it. Learners will come to understand how reducing our negative impact on the environment will also have benefits to our health and to the economy. Finally, learners will find out their legal responsibilities when dealing with waste and the consequences of ignoring them.

Areas covered

- What the environment is and why it is important
- What pollution is
- The main types of pollution
- The costs of pollution to our health, economy and environment
- What bioaccumulation is and how it can occur
- Environmental aspects and their impacts
- The journey pollution takes
- Waste, air and water management
- Our legal responsibilities when dealing with waste and the consequences of ignoring them

Who is it aimed at?

All staff, particularly new starters, where a basic understanding of the environment is required.
