

AWARENESS OF CONFINED SPACES

Create a safer working environment by improving awareness of confined spaces and the risks they present. This microlearning course explains what confined spaces are, where they may be found, and why they can be dangerous. It covers common hazards such as poor ventilation, hazardous substances and restricted access, and outlines control measures to reduce risk, including avoiding entry where possible and following safe systems of work. The course supports safer decision-making and reinforces the importance of following workplace health and safety procedures.

Areas covered

- Identify the common features of a confined space and list typical examples
- Describe the common risks and hazards of working in confined spaces
- Explain the control measures required to reduce risks in confined spaces

Who is it aimed at?

This course is ideal for employees, contractors, supervisors and managers across any sector who may encounter confined spaces as part of their work and need an awareness of the associated risks and control measures.

Multi-device compatible

This course is compatible with most popular desktops, tablets and mobile devices.

Key details at a glance

- Duration:** 20 minutes
- Assessment:** Formative assessment with no formal knowledge check
- Certificated:** Yes – Highfield Completion Certificate
- Support:** 01302 363277
support@highfield.co.uk
- Translation:** Details available on request
- Localisation:** EU legislation within a UK context, but suitable for international businesses that trade with the EU and will be subject to the legislation
