

PASSWORD MANAGEMENT

Improve password security and reduce security risks with our Password Management online training course. This micro-teach helps learners recognise password management practices that can increase security risks and introduces safer ways to manage passwords and account access. It covers unique passwords and passphrases, approved password managers, multi-factor authentication (MFA) and passkeys, helping learners apply safer password management practices to protect accounts and information.

Areas covered

- Recognise password management practices that increase security risks
- Identify safer ways to manage passwords and account access
- Apply password management practices that help protect accounts and information

Who is it aimed at?

This course is aimed at anyone who uses workplace accounts and systems and provides a simple foundation for managing passwords and account access more securely.

Multi-device compatible

This course is compatible with most popular desktops, tablets and mobile devices.
