

SOCIAL ENGINEERING AWARENESS

Support your learners to recognise, verify and report social engineering attempts with this focused online micro-teach. The course explores how social engineering can occur through email, messaging, phone, social media and face to face interactions, helping learners verify unexpected requests, follow workplace procedures and report suspected attempts.

Areas covered

- What social engineering is and why it is effective
- Situations that may involve social engineering
- How to verify and report suspected social engineering attempts

Who is it aimed at?

Suitable for employees across all sectors who communicate with colleagues, customers, suppliers or other organisations as part of their role.

Multi-device compatible

This course is compatible with most popular desktops, tablets and mobile devices.
